

DI AMBASSADOR CASE STUDY

Izabela | 20 | 2020-2021 Cohort

IT'S BEEN AWHILE SINCE YOU FINISHED WITH US, IZABELA! WHAT HAVE YOU BEEN UP TO SINCE?

"Since completing the Digital Innovators Skills Programme and finishing my studies, I have become an **Engineering Apprentice** at **UK Atomic Energy Authority**. I'm just over a year into this apprenticeship and I am really enjoying it so far!"

WHAT WAS YOUR TIME ON THE DI SKILLS PROGRAMME LIKE?

"Taking part in the DI Skills programme was a **really good experience** because it gave me the chance to **develop my communication skills** and **my ability to lead a team**.

It also provided me with a project to work on which allowed me to **apply my knowledge** and **explore my interests outside of college**. During the Gener8 Door project, I developed a **physical prototype from scratch** which enabled revolving doors to generate power to supply buildings.

Not only did this project enable me to gain **more confidence** and to **get out of my comfort zone**, but it gave me **tangible experience** to discuss in my interview for my current position."

WHAT'S NEXT FOR YOU, IZABELA?

"My plan for the immediate future is to finish my engineering apprenticeship which is another four years! After that, I'm not quite sure yet so we will see..."

PROJECT DETAILS

Gener8 Door

How can we generate power to supply buildings using revolving doors?

HIGHLIGHTS

- Developed a **physical prototype** from scratch.
- Had **experience to discuss in apprenticeship interview** which helped to secure the position!
