

## DI AMBASSADOR CASE STUDY

Harrison | 18 | 2021-2022 Cohort

### WHAT DID THIS PROGRAMME TEACH YOU?

"Biggest learning point for me was understanding how best to conduct myself and approach the working environment. Digital Innovators allowed me to experiment with different strategies, which I adjusted and perfected throughout the program, thanks to the very fail-tolerant approach. Additionally, I learnt how to communicate calmly and effectively with clients to best understand their needs, whilst building rapport. As well as how best to adapt to barriers in communication, such as a gap in technical knowledge between myself and others in different fields."

### WHAT DID YOU ENJOY ABOUT THE PROGRAMME?

- Learning every single day
- The tailored experience during project work, as the coaches came in when I struggled and let me thrive when I thrived
- Opportunities to push myself further in both technical experience and leadership prowess
- A step away from the cotton-wrapped education doctrine in colleges. I had responsibility and accountability to manage, which felt awesome

### GREAT! SO, WHY SHOULD SOMEONE TAKE PART IN THE DI SKILLS PROGRAMME?

"Push yourself early and fail quickly. In my humble opinion, the best way to learn and grow personally is to throw yourself into situations that are both challenging and novel. The additional perk that Digital Innovators offers is the ever-present support from coaches, who are available to provide instant, actionable feedback when you stumble.

If you're looking for a place to experience the working world and venture deeper for a taste of your future career, then look no further and give it your 100%."

### PROJECT DETAILS

How can we make the Core Library's exhibitions more accessible and immersive?

### HIGHLIGHTS

- Became a **mentor** at Digital Innovators
- Completed a **high-quality** project with a local employer.
- **Taught** peers how to use 3D modelling software
